Inflation Monster Workshop:

Getting started

Kids Arriving

- Create name tags for everyone while entering
- Play some music to create a good mood

Introduction

- Welcome everyone
- Introduce ourselves & Bitcoin Indonesia
- Explain “Why Bitcoin?”
- Let kids introduce themselves (use a ball to throw around):
 - What’s your name?
 - Where are you from?
 - If you know something about Bitcoin, you can share it
- Explain agenda for today:
 - Learn the basics of money, inflation, and Bitcoin in a playful way. You will get to know the inflation monster!
 - We can install your first Bitcoin wallet if you like
 - In the end, we will give you some information about how to continue learning
- Set the scene:
 - Parents can stay here or have a good time in the restaurant
 - Workshop will take around 2 hours
 - Are you ok if we take some photos?

Physical Warm-Up:

- Do a little activity wake up everyone in a playful way
- (e.g. put stickers and pens in a different room/place so that they need to run or walk a bit and come back)

Inflation Monster Workshop:

Let's play

Game: Inflation Monster & Bitcoin

→ The goal of the game is to explain problems with the Indonesian Rupiah and the advantages of saving in bitcoin in a simple and playful way.

Preparation:

- Prepare stacks of 10 papers for the money notes & Bitcoin coins to save time
- Prepare the Supermarket cards and Fun Park cards on the table or whiteboard
- Handout a sheet of paper and a pen to every kid
- Everyone should fold the paper & draw a big piggy bank on the left side and a shopping bag or cart on the right side of the paper

Round 1 – Day 1 “Rupiah”:

- Everyone receives 10x little Rupiah notes (game money) to put in his/her piggy bank. We say it's the money they got from their parents or grandparents
- In the middle of the table is a supermarket, where you can find essentials (i.e. food and beverages) and fun stuff (e.g. Fortnite skins, a basketball, sweets, a cool t-shirt, water color, etc.)
- The supermarket opens and everyone can use the money from the piggy bank to buy something. Everyone has to buy at least 1x food and 1x beverages first and can spend the rest of the money on fun stuff or save the money in the piggy bank. The kids take the cards (e.g. the Nasi Campur) from the middle of the table and put them into their shopping bag
- Day 1 ends and everyone “eats and drinks” the food and beverages they bought (i.e. give back the food and beverages cards)
- Sleeping time! Everybody should lie down, close their eyes, and pretend to be asleep. You can turn off the lights and play sleeping music
- (SLEEP MUSIC FOR KIDS – Nursery Rhymes Music) and a rooster sound
- (Rooster Sound Effect) to wake up kids.

Inflation Monster Workshop:

Round 2 – Day 2 “Rupiah”:

- Everyone receives new 10x little Rupiah notes (game money) to fill up his/her piggy bank again
- Now, the inflation monster comes! We play a short scene of a cartoon to show the inflation monster (The Inflation Monster at the Federal Reserve | Tuttle Twins |). Show the printed version of the inflation monster and play dramatic music (dramatic film music, exciting sound effect #38 YouTube) The inflation monster takes away 3 notes of everyone's piggy bank and changes the prices in the supermarket. All goods become more expensive (e.g. double in price).
- Now, the supermarket opens again and the kids can spend their money (again, first buy essentials and then buy fun stuff with the remaining money). The kids will see, that they have less money to spend and can't afford anymore fun stuff since the inflation monster increased the prices so much.
- Day 2 ends and everyone “eats and drinks” the food and beverages they bought (i.e. give back the food and beverages cards)

Reflect:

Ask the kids how they feel.

Damn, the inflation monster is so evil! What can we do to protect ourselves from the inflation monster? How can we make sure that the money our parents worked so hard for is not taken away? How can we make sure that we continue to have a good life with lots of fun? Do you have any ideas?

Kids share ideas, we say these are good ideas, but the inflation monster is so strong that they do not stop him from taking the money.

How about we have money that the inflation monster does not like? A money like Bitcoin!

Time travel:

Let's use the time travel machine to go back in time to day 1. Play the sound of a time travel machine (Time Machine Sound Effect).

Let's play the game again, but this time we put bitcoin in our piggy banks.

Inflation Monster Workshop:

Introducing Bitcoin

Round 3 – Day 1 “Bitcoin”:

- Everyone receives 10x little Bitcoin coins (game money) to put in his/her piggy bank.
- The supermarket opens and everyone can use the money from the piggy bank to buy something. Everyone has to buy food and beverages first and can spend the rest of the money on fun stuff or save the money in the piggy bank – as always
- Day 1 ends and everyone “eats and drinks” the food and beverages they bought (i.e. give back the food and beverages cards)
- Sleeping time! Everybody should lie down, close their eyes, and pretend to be asleep. You can turn off the lights and play sleeping music
- (SLEEP MUSIC FOR KIDS – Nursery Rhymes Music) and a rooster sound
- (Rooster Sound Effect) to wake up kids.

Round 4 – Day 2 “Bitcoin”:

- Everyone receives 10x little Bitcoin coins (game money) to put in his/her piggy bank.
- The inflation monster wants to come but the little Hodler (a Bitcoin plush doll) throws the inflation monster outside of the house and changes the prices in the supermarket. Everything becomes cheaper!
- Everyone can use the money from the piggy bank to buy something. Everyone has to buy food and beverages first and can spend the rest of the money on fun stuff or save the money in the piggy bank – as always. The kids will see, that they now can buy a lot of fun stuff!
- We ask them: ok, before the supermarket closes – are you sure you want to buy all these things or so do you want to save some of the money? Maybe the prices decrease again in the next round? What do you think?
- Day 4 ends and everyone “eats and drinks” the food and beverages they bought (i.e. give back the food and beverages cards)

Summary:

What did we learn? Who likes the inflation monster? Who likes Bitcoin?

If we save in Rupiah, the inflation monster takes away our money and increases the prices. Over time, we get poorer and poorer and can't afford our favorite things anymore. Life becomes sad. If we save in bitcoin, everything becomes cheaper over time. Our life is good and improves. Furthermore, if we don't spend everything directly and keep it in our piggy bank, we can buy even more in the future! (Show poster of Rupiah vs. Bitcoin)

Inflation Monster Workshop:

Starting our Bitcoin journey

First Bitcoin Wallet

→ Now the kids can decide if they want to save some of their money in bitcoin to have more money in the future.

- Ask who wants to install a Bitcoin wallet
- We install a wallet together on their phone/iPad
- They can go to the Bitcoin Bank (i.e. workshop host) and exchange their Rupiah into bitcoin (e.g. 50,000 IDR)
- To practice using wallet, everybody receives 2,000 IDR in bitcoin for showing up to the workshop and can buy some Bitcoin sticker with it from us
- Explain that there are different wallets, with different security, this is for beginners, not for your life time savings (show graphic of 3 wallet stages)

Closing & Goodbye

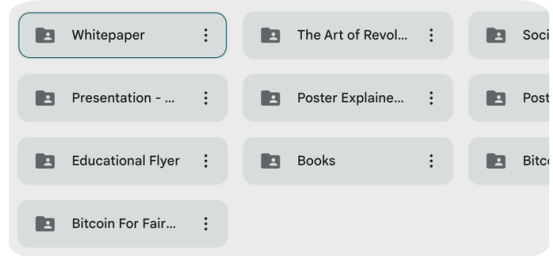

- Everyone gets a little goodie bag from us (with some stickers, a printed bitcoin cartoon, info material for the parents and kids, link to cartoon video, etc.)
- We ask "How did you like the workshop? Was it fun? Did you learn something?"
- We provide them with further resources to learn more (cartoon, book, join our meetups, visit our website or social media, let's do another workshop)
- We invite them to join the next Bitcoin For Kids workshop (Level 2)

Everything you need.

FREE Meetup Materials

Use our flyers, presentations, books, social media content & more for your meetup.
